

REMARKS

Claims 1-11 are pending and are rejected.

Claims 1 and 6 are amended as suggested by the Examiner on a telephone interview on September 20, 2005.

CLAIMS

**Rejection under 35 USC 102(e) as being anticipated by US Patent Publication
US2002/0072326 A1 ("Qureshey")**

Responsive to the rejection of claims 1, 2, and 5-9 under 35 USC 102(e) as being anticipated by Qureshey, applicant has amended independent claims 1 and 6, as suggested by the Examiner in the telephone interview on September 20, 2005, to more particularly point out and distinctly claim the subject matter that applicant regards as the invention. The Examiner agrees that the amendment overcomes the rejection because Qureshey does not disclose or suggest a method for selecting a language in which on-screen displays are displayed and audio programs are broadcast by entering a single selection on an on-screen display, wherein after the selection, the on-screen displays are displayed in the selected language and the audio programs are broadcast on the receiver in the selected language, as recited in amended independent claims 1 and 6.

**Rejection under 35 USC 103(a) as being unpatentable
over Qureshey in view of US Patent No. 6,519,009 B1 ("Hanaya")**

Responsive to the rejection of claims 3-4 and 10-11 under 35 USC 103(a) as being unpatentable over Qureshey in view of Hanaya, applicant respectfully submits that these claims are patentable over these two references because the two references,

considered singly and in combination, do not disclose or suggest a method or apparatus including the feature of selecting a language in which on-screen displays are displayed and audio programs are broadcast on a receiver by entering a single selection on an on-screen display, wherein after the selection, the on-screen displays are displayed in the selected language and the audio programs are broadcast on the receiver in the selected language, as recited in amended independent claims 1 and 6, from which claims 3-4 and 10-11 respectively depend.

As discussed above, Qureshey does not disclose or suggest the selecting feature as recited in amended claims 1 and 6. Neither does Hanaya, which discloses a program switching device and a method thereof which allows users to select a desired program very swiftly with a simple operation by preliminarily initiating the receiving operation in accordance with a cursor movement on a control display without waiting for the determination of users. See col. 1, lines 41-47. Thus, Qureshey and Hanaya, considered singly and in combination, do not disclose or suggest the selecting feature as recited in amended claims 1 and 6. As such, claims 1 and 6, and respective dependent claims 3-4 and 10-11, are patentable over the two references.

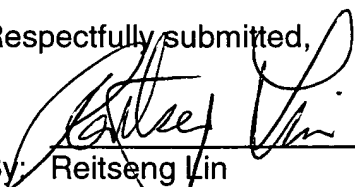

CONCLUSION

In view of the foregoing remarks and amendments, the Applicant believes that he has overcome all of the Examiner's basis for rejection, and that this application therefore stands in condition for allowance. However, if the Examiner is of the opinion that such action cannot be taken, the Applicant requests that he contact the undersigned attorney in order to resolve any outstanding issues without the necessity of issuing another Office Action.
